Akshay Jathar

Product Owner | Digital Lending | Payments | AI-Enabled Product Operations

Mumbai, India | +91-9730181327 | akshayjathar027@gmail.com | LinkedIn

Professional Summary

Product Owner with 3+ years of experience in digital lending, loan servicing, and enterprise payment systems at Axis Bank. Experienced in driving end-to-end product execution across customer journeys, repayment workflows, payment infrastructure, and regulatory-compliant banking platforms. Strong domain expertise across LMS workflows, UPI AutoPay, NACH mandates, NEFT, RTGS, IMPS, and internal fund transfer systems, with hands-on experience collaborating across engineering, operations, compliance, and business teams. Increasingly focused on AI-enabled product operations, workflow automation, issue pattern analysis, and data-informed product decision-making to improve efficiency and customer experience in BFSI environments.

Core Competencies

Product & Delivery: Product roadmap execution, backlog prioritization, Agile delivery, sprint planning, requirement gathering, user stories, stakeholder management, customer journey improvement

Lending & Banking: Digital lending, loan servicing, EMI workflows, repayment schedules, settlements, part-payment journeys, customer servicing, regulatory change delivery

Payments & Infrastructure: UPI, UPI AutoPay, NACH, NEFT, RTGS, IMPS, internal fund transfers, payment infrastructure, banking APIs, Finacle, SFMS

AI, Data & Tools: AI-assisted workflow improvement, issue pattern analysis, process automation, REST APIs, asynchronous APIs, Postman, Jira, Confluence, Figma, Amazon QuickSight

Professional Experience

Axis Bank | Mumbai, India

Product Owner - DBAT Team **Apr 2025 - Present**

- Own the end-to-end product roadmap for a digital personal loan servicing platform, managing post-disbursement customer journeys for retail lending products.
- Designed and launched a Self-Service Portal, increasing digital self-service adoption by 30% and reducing dependency on support channels.
- Lead cross-functional collaboration across engineering, operations, compliance, and business teams to deliver high-impact lending product releases in Agile sprint cycles.
- Manage Loan Management System workflows covering EMI processing, repayment schedules, settlements, part-payments, and customer account servicing.
- Delivered repayment journey enhancements including UPI AutoPay and NACH mandate integrations, improving repayment flexibility and customer convenience.
- Automated operational workflows within lending systems, reducing manual intervention by 25% and improving process efficiency.
- Translate customer pain points, operational issues, and regulatory requirements into product requirements, user stories, and scalable solutions.
- Improved complaint resolution workflows through issue analysis, product fixes, and process improvements.
- Bring an AI-enabled mindset to product and operations improvement through structured issue analysis, workflow simplification, and automation-oriented thinking.

Business Analyst - Business Solutions Group **Jun 2023 - Apr 2025**

- Worked on enterprise payment infrastructure supporting high-volume transactions across NEFT, RTGS, IMPS, and internal fund transfer systems, integrated with Finacle and SFMS.
- Contributed to development and optimization of the Global Payment System (GPS) supporting large-scale transaction processing across retail and enterprise banking operations.
- Supported development of the Bulk Payment System (ABBPS) for automated enterprise payment processing use cases.
- Played a key role in the Citi-Axis Bank technology migration project, supporting system integration during a large-scale banking merger initiative.

- Delivered 10+ product and regulatory enhancements, improving transaction processing efficiency by 20% across payment infrastructure systems.
- Collaborated with stakeholders to gather business requirements, prepare BRD/FRD documentation, define workflows, and support UAT and release execution.
- Built strong exposure to payment workflows, system dependencies, exception handling, and regulated banking technology environments.

Education

Bachelor of Engineering (B.E.), First Class
Pune University
